Complete Desktop Interferometer System

- Economical for the lab and production
- 1" Aperture
- Compact and portable
- 10" X 18" footprint
- Extremely stable
- Measure radius of curvature and surface irregularity
- Motorized alignment and zoom
- Multi-axis lens mounting system
- Fringe analysis software
- Transmission spheres sold separately

A decorative background image showing various optical components like lenses and mirrors in a laboratory setting, overlaid with a red-tinted geometric pattern.
